SUMMARY

Third-year Software Engineering undergraduate at the University of Kelaniya with a strong passion for full-stack development and cloud technologies. Experienced in building practical, real-world solutions using modern tech stacks. Motivated to contribute to impactful projects, excel in collaborative environments, and continuously grow as a developer and team player.

SKILLS

Frontend : React, JavaScript, HTML5, CSS, Tailwind CSS

Backend : Springboot, Express.js, Node.js, Java, PHP

Database : MongoDB, MySQL

Cloud : AWS

Tools : Git, Docker, Figma

EDUCATION

B.Sc.(Hons.) Software Engineering

University of Kelaniya

April 2024 - Present

- CGPA : 3.35
- Specializing in Net-Centric Applications, Data Science and Engineering Applications, Business Engineering Applications and Health Informatic Applications domains

G.C.E. Advanced Level

C. W. W. Kannangara Central College, Mathugama

2013 - 2021

- Physical Science Stream
Z - score : 1.4867
-

PROJECTS

MERN E-Commerce App - Individual

[Github Repo](#)

Developed a full-stack e-commerce platform with secure user authentication, product management, shopping cart, and order processing features. Implemented responsive UI for seamless user experience. Used REST APIs for frontend-backend communication and Docker for deployment.

Technologies : React, Node.js, MongoDB, JWT, Docker

house-renting-website - Group Project

[GitHub Repo](#)

Developed a role-based house renting web application that enables members to browse and purchase houses, managers to manage property listings, and admins to oversee users, discounts, and reports. Implemented secure authentication, Stripe payment integration for test transactions, and a responsive multi-module UI. Collaborated in a team-based development environment with shared module ownership and integration testing.

Technologies : PHP, MySQL, Stripe, HTML, CSS, JavaScript, Bootstrap

Reservation-System - Individual

[GitHub Repo](#)

Developed a full-stack room reservation system enabling users to browse, book, and manage room reservations through an intuitive interface. Implemented secure authentication and role-based access control for users and administrators, along with real-time room availability tracking and instant booking confirmation. Built scalable RESTful APIs with efficient backend processing and a responsive frontend for seamless user experience.

Technologies : Java 17, Spring Boot, Spring Security, React, MySQL, JWT, Axios, Vite, Maven

ReserveX- Group Project

[GitHub Repo](#)

Developed a full-stack stall booking platform for the Colombo International Book Fair featuring interactive floor-plan stall selection, dual vendor/admin portals, and role-based access control. Implemented secure JWT authentication, automated email confirmations with QR code receipts, and real-time analytics dashboards for reservation monitoring. Built scalable REST APIs with Spring Boot and responsive frontend portals using React.

Technologies : Java 17, Spring Boot, Spring Security, React, MySQL, JWT, SMTP, Axios, Vite, Maven

VOLUNTEERING

- | | |
|---|----------------|
| • Member, IEEE Student Branch | 2024 - Present |
| • Member, Software Engineering Students' Association (SESA) | 2024 - Present |
| • Head of IR & IE, IEEE WIE Student Branch | 2025 - Present |
-
