SUMMARY

Third-year Software Engineering undergraduate at the University of Kelaniya with a strong passion for full-stack development and cloud technologies. Experienced in building practical, real-world solutions using modern tech stacks. Motivated to contribute to impactful projects, excel in collaborative environments, and continuously grow as a developer and team player.

EDUCATION

B.Sc.(Hons.) Software Engineering

University of Kelaniya

April 2024 – Present

- CGPA : 3.68
- Specializing in Net-Centric Applications, Data Science and Engineering Applications and Health Informatic Applications domains

G.C.E. Advanced Level

C. W. W. Kannangara Central College, Mathugama

2013 – 2021

- Physical Science Stream

Z – score : 1.4867

SKILLS

Frontend : React, JavaScript, HTML5, CSS, Tailwind CSS

Backend : Springboot, Express.js, Node.js, Java, PHP

Database : MongoDB, MySQL

Cloud : AWS

Tools : Git, Docker, Figma

PROJECTS

MERN E-Commerce App – Individual

[GitHub Repo](#)

Developed a full-stack e-commerce platform with secure user authentication, product management, shopping cart, and order processing features. Implemented responsive UI for seamless user experience. Used REST APIs for frontend-backend communication and Docker for deployment.

- **Technologies** : React, Node.js, MongoDB, JWT, Docker, Redux, Redis, Axios

house-renting-website – Group Project

[GitHub Repo](#)

Developed a role-based house renting web application that enables members to browse and purchase houses, managers to manage property listings, and admins to oversee users, discounts, and reports. Implemented secure authentication, Stripe payment integration for test transactions, and a responsive multi-module UI. Collaborated in a team-based development environment with shared module ownership and integration testing.

- **Technologies** : PHP, MySQL, Stripe, HTML, CSS, JavaScript, Bootstrap

ChatSphere - Individual

[GitHub Repo](#)

Developed a full-stack real-time chat application enabling users to communicate instantly through private and group messaging with a modern and responsive interface. Implemented secure user authentication and authorization using JWT, along with real-time message delivery, online user status tracking, and chat history management. Built scalable RESTful APIs and socket-based communication for seamless real-time interaction, efficient backend performance, and smooth user experience across devices.

- **Technologies :** MongoDB, Express.js, React, Node.js, Socket.io, JWT, Axios, Tailwind CSS, Vite, REST API
-

ReserveX- Group Project

[GitHub Repo](#)

Developed a full-stack stall booking platform for the Colombo International Book Fair featuring interactive floor-plan stall selection, dual vendor/admin portals, and role-based access control. Implemented secure JWT authentication, automated email confirmations with QR code receipts, and real-time analytics dashboards for reservation monitoring. Built scalable REST APIs with Spring Boot and responsive frontend portals using React.

- **Technologies :** Java 17, Spring Boot, Spring Security, React, MySQL, JWT, SMTP, Axios, Vite, Maven
-

CERTIFICATES

- Introduction to Java - sololearn
 - Java Intermediate - sololearn
 - Diploma in Website Development using HTML and CSS - Alison
 - Deliver with DevOps - Microsoft
-

VOLUNTEERING

- | | |
|---|----------------|
| • Member, IEEE Student Branch | 2024 - Present |
| • Member, Software Engineering Students' Association (SESA) | 2024 - Present |
| ▪ Finance coordinator of JuniorHack 7.0 : 2025 | |
| • Head of IR & IE, IEEE WIE Student Branch | 2025 - Present |
-

LANGUAGES

- English : Professional Proficiency
 - Sinhala : Native Proficiency
-
